

# Energy Efficiency Training Series

In conjunction with the Association of Energy Engineers

## Energy Solutions for Schools

### OVERVIEW

Whether you are a school business manager, facility manager, engineering or maintenance staff you are invited to learn about the fundamentals of Energy Management. You'll learn how to incorporate energy management principles into your daily operations that will help your districts become more efficient and save on energy and maintenance costs. Upon completion of this all day workshop you will gain an understanding of

- Current energy management principles
- How to create a facility baseline and identify meaningful goals
- Energy best practices
- The financial impact of energy saving projects
- What an energy management plan should include
- APS Solutions for Business incentive program

High Country Conference Center, Flagstaff

### Energy Simulation

August 19, 2009  
7:30 a.m. - 4:30 p.m.  
Tempe Mission Palms Hotel

## APS ENERGY EFFICIENCY PROGRAMS

The APS Solutions for Business program offers incentives for APS business customers who upgrade their facility with energy efficient equipment or construct a new energy efficient building. The program encourages business owners to invest in more energy efficient equipment and systems and provides support through energy study, design assistance, retro-commissioning and commissioning incentives. Contractors may apply to be approved program Trade Allies.

The program offers Energy Information Services (a web-based program) which can help you understand and control your facilities' electricity use. This service provides data on when, where and how much power is used in specific areas of each facility, so you can fine-tune equipment use and operations to optimize energy consumption.

Solutions for Business also provides a range of technical training opportunities, including Building Operator Training. For a complete schedule of training workshops and detailed program information, please visit **aps.com** and click on "Business Rebates."

APS business customers can also take advantage of the many renewable energy resources available in Arizona like solar, wind, geo-thermal, biomass and bio-gas. To find out more about current APS Renewable Energy Incentives and program parameters, visit **aps.com**.
