

Lighting Bulletin: Time Running Out for T12 Rebates

Are you planning to replace your existing T12 lighting system with standard T8 equipment? As of December 31, 2013, the APS Solutions for Business Program will no longer accept rebate applications for T12 to standard T8 lamp upgrades.

APS encourages you to act now and take advantage of this rebate while it is available.

APS rebates reduce the average T12 to T8 retrofit project cost by 28%.

Replacing overhead T12 lamps and magnetic ballasts with T8 lamps and electronic ballasts can cut lighting energy use by 30%. To increase your savings, install premium T8 lamps.

The U.S. Department of Energy mandated that T12 fluorescent lamps be phased out of production by July 2012. Solutions for Business incentives can make it easier to upgrade to more-efficient systems, so make sure to send us your T8 lamp upgrade applications before December 31, 2013.

For more information on incentives, visit the program website at aps.com/business or call the local program team at 866 277 5605.
