Winner of the 2008 Governor's Achievement Award for School as Center of Community

Verrado Middle School Grades 6-8 Litchfield Elementary School District

The Verrado Middle School in Buckeye was selected by a panel of judges for the Governor's Achievement Award because of its clear connection to the community by virtue of its comfortable scale and how its design echoes that of other public buildings in Buckeye, which are developed at a level of refinement and authenticity that is not the norm in other recent attempts at Spanish Mission Revival Style in Metro Phoenix. The panel also appreciated the collaborative participation of the master land developer in the project.

Defining facility attributes: cooperative funding, shared use of site and buildings, obvious and hospitable entry to site and buildings, direct and safe routes to school, spaces adaptable for multiple activities

Funding Data:

Built: 2004
Substantial Completion: Jan. 1, 2005
Student Capacity: 1,088

Orcutt | Winslow Architects
D.L. Withers, General Contractor

Land: 29.623 acres was donated by DMB Development at a value of \$3,555,000, of which half, 15(+/-) acres was for Verrado Middle School, the balance was for a neighboring elementary school

SFB Project #'s: 070479000-9999-003N (core)
070479000-9999-005N (buildout)

SFB New School Facilities funding:	003N	\$3,225,370
	005N	<u>\$5,748,511</u>
	Total	\$8,973,881

Local Bond funding:	003N	\$ 538,958
	005N	<u>\$3,500,001</u>
	Total	\$4,038,959

Total funding: \$13,012,840

Value of Land Donation (1/2 of total value): \$ 1,777,500

Interim Executive Director
Dean T. Gray

December 14, 2009

The Honorable Jan Brewer
Governor of Arizona
1700 West Washington Street
Phoenix, Arizona 85007

Dear Governor Brewer,

On behalf of the School Facilities Board, I am pleased to transmit to you the School Facilities Board Annual Report for fiscal year 2009.

The report details the Board's actions during the course of this year. In FY 2009, with the help of the Board, school districts opened 23 SFB funded new school projects. The Board also distributed just over \$3 million in Emergency Deficiencies Corrections funding and awarded \$7 million in Building Renewal Grant funding. The Overview section of this report presents these and other FY 2009 achievements.

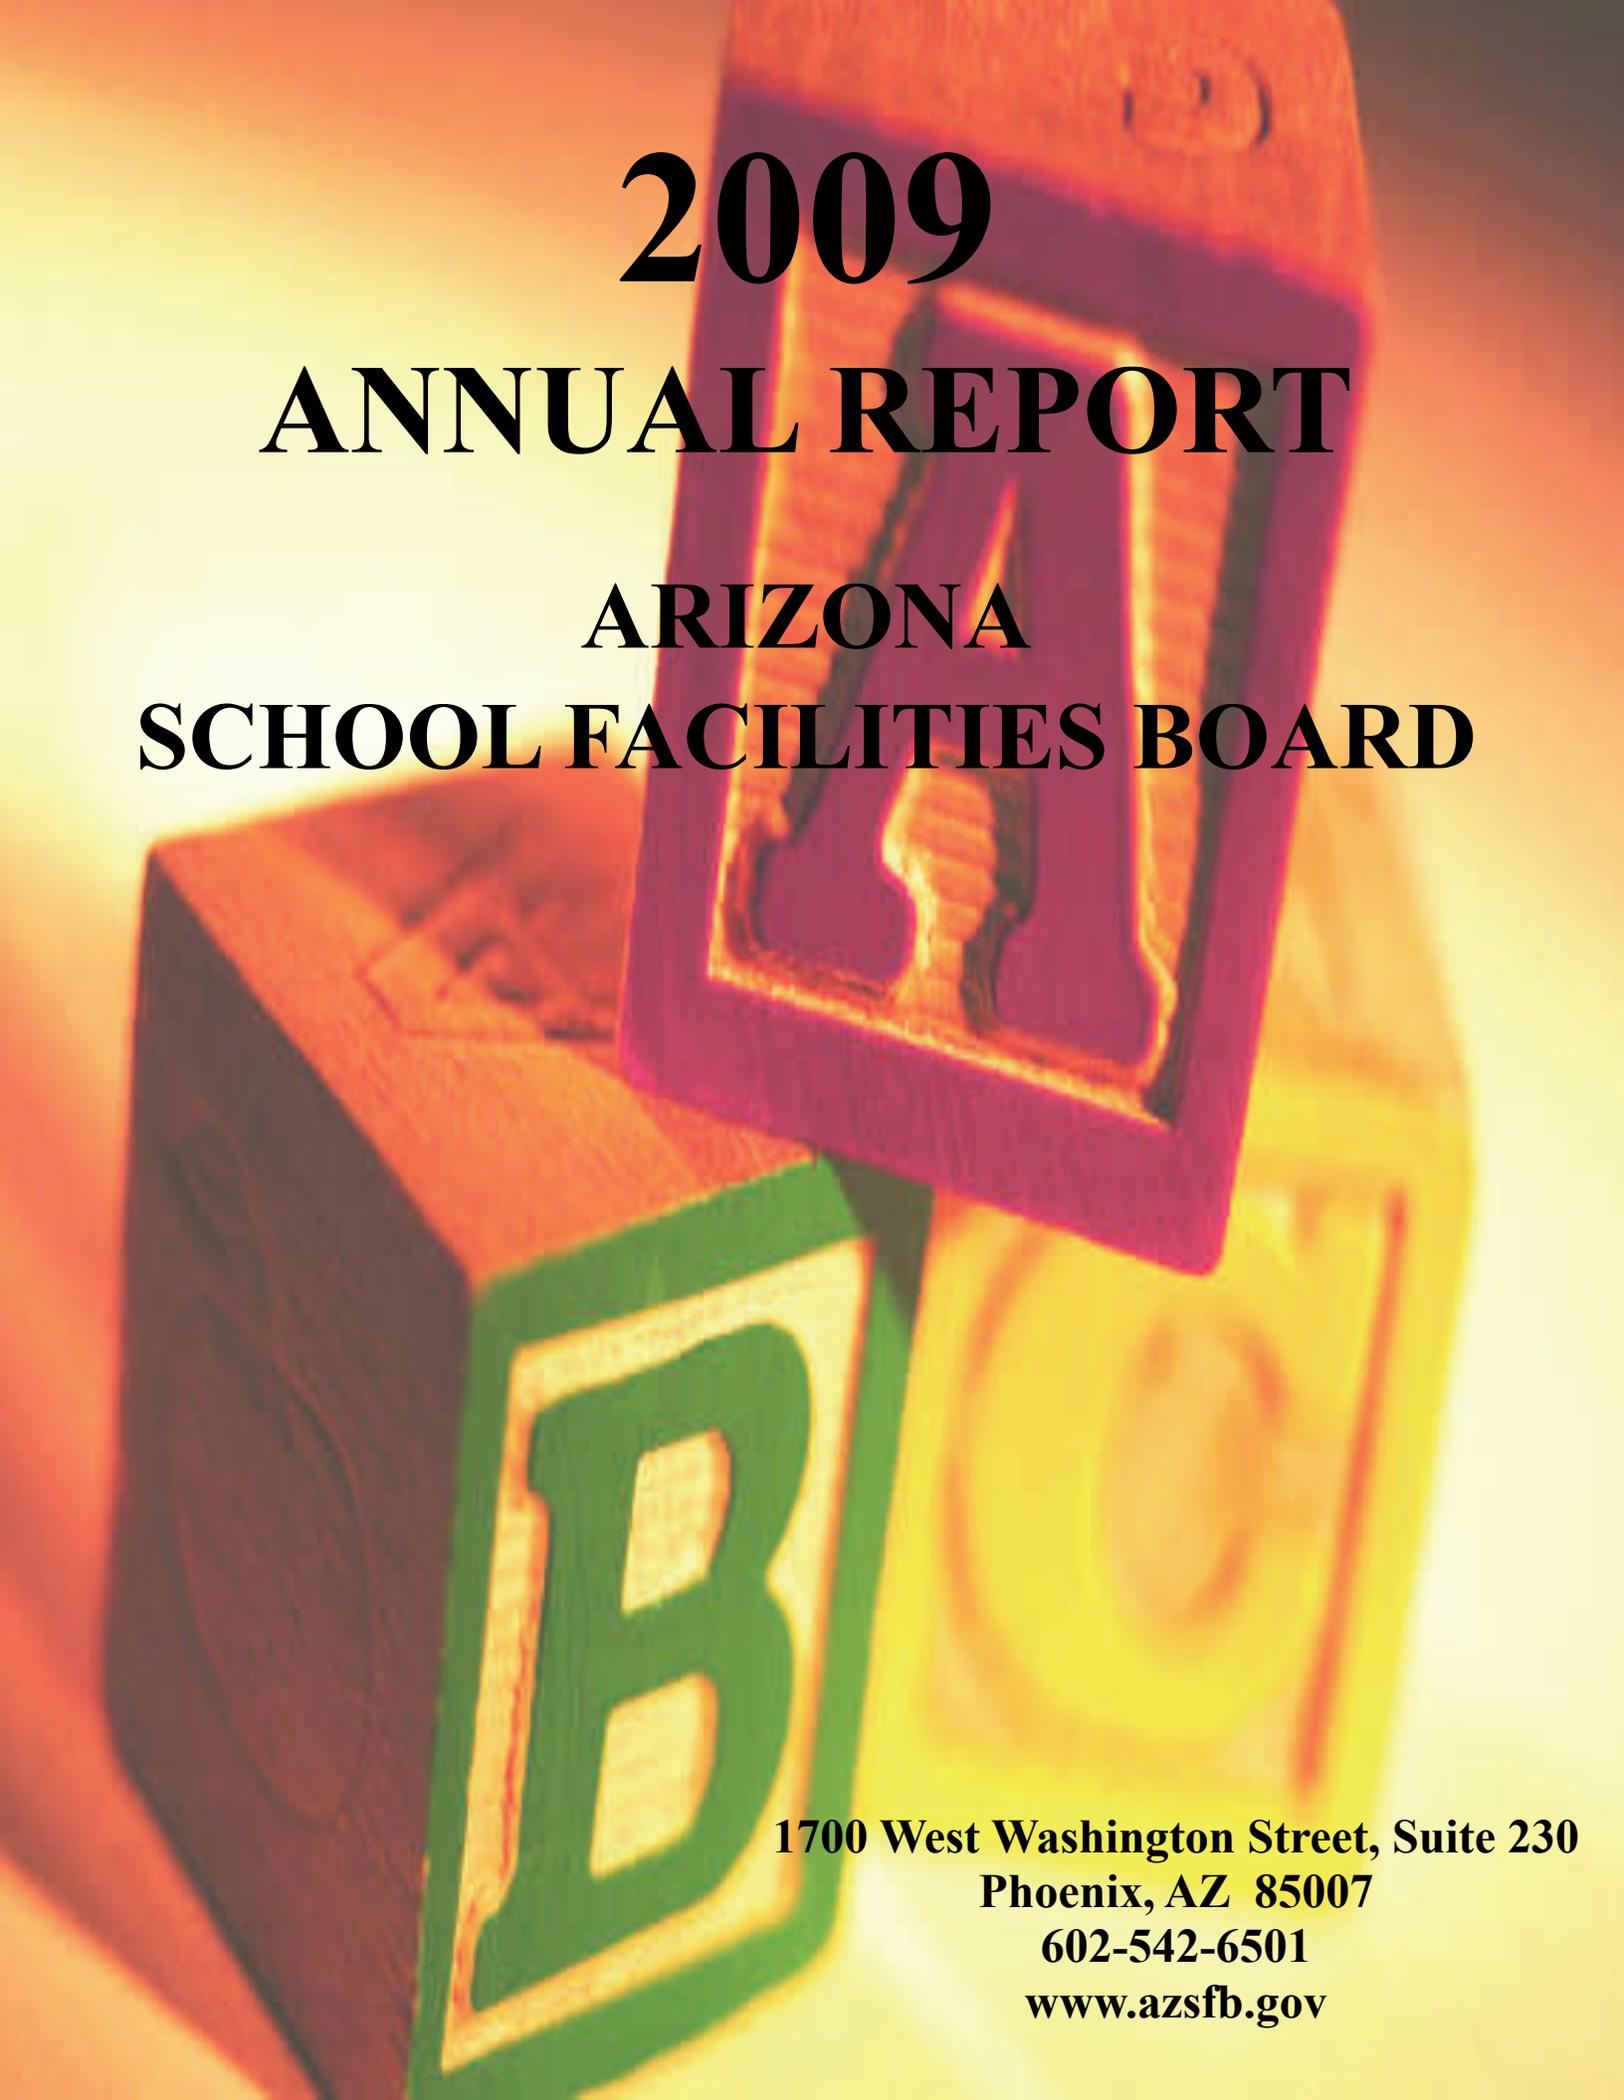

During the upcoming year, the School Facilities Board looks forward to continuing to improve school facilities. Despite the State's fiscal challenges, there are several steps we can take. Preventative maintenance, creative school design, staff training, and tight controls on electrical and gas consumption need to be addressed in these times of budget restrictions. The School Facilities Board can play a larger role in training school personnel and communicating with local school district leadership to ensure that every capital dollar is used appropriately. With these and other steps, the Board will continue to ensure the academic space needs of Arizona students are met.

Sincerely,

A handwritten signature in black ink, appearing to be "DTG", written over a white rectangular area.

Dean T. Gray

Students FIRST Summary

Students FIRST - In 1994, Arizona's system of school capital finance was declared unconstitutional because it failed to conform to the State constitution's "general and uniform" clause. That system relied on the secondary property tax, driven by the property wealth of a school district, and general obligation bonding. In 1996, the Arizona Superior Court imposed on the State a deadline to develop a constitutional system of school capital finance or risk closure of K-12 public schools. As a result, Governor Jane Dee Hull signed legislation that dramatically reformed the way K-12 schools are constructed in Arizona. This ended the four-year legal and legislative battle and established Arizona as the nation's school finance reform leader. This legislation/law is known as Students FIRST (Fair and Immediate Resources for Students Today).

School Facilities Board - Students FIRST is a capital finance program funded by appropriations from the State General Fund. The program is administered by the School Facilities Board (SFB), which consists of nine voting members appointed by the Governor; in addition, the Superintendent of Public Instruction serves as a non-voting member. The Board is charged with the administration of three capital funds: 1) New School Facilities, 2) Building Renewal, and 3) Emergency Deficiency Corrections.

New School Facilities - Students FIRST established a new school facilities fund for the purpose of constructing new schools to meet the minimum adequacy guidelines. The criteria to determine district eligibility for new school facilities funding are based on an annual evaluation and approval of district enrollment projections and the additional square footage that will be needed to maintain adequacy standards in a district.

Building Renewal - Students FIRST established a building renewal fund for the purpose of maintaining the adequacy of existing school facilities. These monies can be used for major renovations and repairs of a building, for upgrades to building systems that will maintain or extend the useful life of a building, and for infrastructure costs. A building's square footage, age, and the student capacity are used in the building renewal calculation.

Emergency Deficiency Corrections - The Emergency Deficiency Corrections Program is an application-based funding program wherein school districts may apply to the SFB for funds to correct facility deficiencies that threaten the functioning of the school district, the preservation or protection of property or public health, welfare or safety. The cost of the correction must also exceed the current year budget.

Arizona School Facilities Board

Members

Dr. Frank Davidson, Chair

fdavidson@azsfb.gov

Dr. Frank Davidson is the Superintendent of Casa Grande Elementary School District, where he has been since 1997. He began his career in education serving as a volunteer in the United States Peace Corps and has been a teacher in kindergarten through high school, an elementary school principal, an Assistant Superintendent for Instruction, and Superintendent. He holds degrees from Southwestern College in Winfield, Kansas and the University of Arizona. Dr. Davidson is the past President of the Superintendents Division of the Arizona School Administrators As-

Gary Marks

Gary Marks is the Executive Director of the Prescott Valley Economic Development Foundation where he directs and oversees the economic development for commercial and industrial activities for Prescott Valley. Gary is currently President of the Humboldt Unified School Board and serves on the Central Arizona Partnership Board. He is also a REDI Director, serves on the Governor's Council on Workforce Policy and on NACOG's Economic Development Committee. State University. He is graduate of EDI and has been a Certified Economic Developer since 1992. School Board Representative. Term expires January 2009.

David Ortega

Arizona native, David Ortega, owns an architectural firm in Scottsdale, which he opened in 1984. A graduate of the U of A, he also studied at La Salle Arquitectura in Mexico City. His professional work includes residential and commercial projects in Arizona and California, including the Chrysalis Shelter for Victims of Domestic Violence and the Saint Maria Goretti Catholic Church. He has been active in the community having served on numerous councils and committees, including the Governor's Latino Advisory Board and most recently served as a Scottsdale City

Dr. Patricia Gober

Dr. Patricia Gober received a PhD in Geography from Ohio State University in 1975 and is currently a professor of geography at Arizona State University where she served as departmental chair from 1984 to 1991. She is the co-Director of the Decision Center for a Desert City which studies water management decisions in the face of growing climatic uncertainty in Greater Phoenix. She holds an honorary doctorate of science from Carthage College in Kenosha, Wisconsin and has served on numerous board and committees including the National Research Council's Committee on Geography which provides independent advise to society and government at all levels on scientific, technical and policy matters related to geography and geographic analysis..

Introduction

Arizona School Facilities Board

Annual Report Requirements

The Annual Report requirements are prescribed in ARS §15-2002.

ARS §15-2002

The school facilities board shall:

...

9. Submit an annual report by December 15 to the speaker of the house of representatives, the president of the senate, the superintendent of public instruction, the director of the Arizona state library, archives and public records and the governor that includes the following information:

(a) A detailed description of the amount of monies distributed by the school facilities board in the previous fiscal year.

(b) A list of each capital project that received monies from the school facilities board during the previous fiscal year, a brief description of each project that was funded and a summary of the board's reasons for the distribution of monies for the project.

(c) A summary of the findings and conclusions of the building maintenance inspections conducted pursuant to this article during the previous fiscal year.

(d) A summary of the findings of common design elements and characteristics of the highest performing schools and the lowest performing schools based on academic productivity including the results of the parent quality rating survey.

For the purposes of this paragraph, "academic productivity" means academic year advancement per calendar year as measured with student-level data using the statewide nationally standardized norm-referenced achievement test.

Overview

Arizona School Facilities Board

This report details the School Facilities Board's efforts in its legislatively assigned duties.

In addition, in FY 2009 the School Facilities Board reviewed and updated four of the ten SFB policy statements, including the adoption of Building Renewal Grant and New Construction Moratorium Policy Statements. These policies include:

- SFB Capital Plans
- Preventative Maintenance
- Board Governance
- Policy Development

New School Facilities

The School Facilities Board awards new school facilities funding to school districts that do not have sufficient academic space to house their students. Sufficient space is determined by comparing district capacity to ADM projections.

ADM change is a function of a large number of factors. In order to make the most accurate projections, the SFB staff collects data from a wide variety of sources including:

- Historical ADM data for each district;
- Census of population and housing as tabulated by the National Center for Education Statistics at the school district level;
- Residential housing completion data from Maricopa and Pinal Counties;
- Permitting data from other counties;

- Birth data for all of Arizona;
- Aerial maps and housing development data for the Phoenix metro area;
- Projections of population, housing, and employment for Maricopa County

In most cases, since these data are not provided at the district level, the SFB uses GIS software to analyze the data on a school district level.

In addition, the SFB staff has calculated and published ADM yield factors (ADM per residential housing unit) for every school district in Arizona based on the 2000 census. Included is a time series of ADM yield factors for each school district in Maricopa County that shows how the yield factors change over time.

Also, available on the SFB website (www.azsfb.gov) are birth data for each district between 2001 and 2008. The SFB staff has built projection models that take advantage of available data and accommodate school districts at different stages of development.

The complete demographic review of the FY 2009 new school capital plan cycle is found on the SFB website:

[FY 2009 New Construction Report](#)

While the SFB did not authorize any new school projects to start construction in FY 2009 due to the new construction moratorium, the budget provided sufficient funds to complete projects that were already under construction.

Overview continued

New School Facilities continued

In FY 2009, the SFB disbursed approximately \$207 million to 63 different school districts. Districts that opened new school facilities in FY 2009 are shown on pages 16 through 19 of this report, and a complete list is provided on page 20 (Table 4). Schools that were still under construction at the end of FY 2009 are included in Table 1 below.

The average cost per square foot is \$146.15 for K-8 space and \$153.92 for 9-12 space. See Table 2 for a breakdown by grade configuration. This cost per square foot includes design, furniture, fixtures, equipment and all construction costs. By adding square footage and other enhancements, school districts added approximately 20 percent to the project cost. Districts added a total of 191,441 square feet in FY 2009.

The FY 2009 budget authorized the SFB to approve new construction projects, subject to legislative appropriation. The budget also changed the law to recognize all kindergarten students as whole

students for ADM purposes. The SFB awarded seven projects in the FY 2009 new school capital plan cycle, all of which are elementary space and were approved based on this new methodology. They value \$41.4 million. Although the FY 2009 budget provided \$8 million for the design of these seven projects, none reached the design phase. Table 3 shows all projects delayed by the moratorium in FY 2009.

The SFB cancelled or downsized five previously-approved projects worth \$64 million, resulting in a net reduction of \$22 million for FY 2009.

New School Facilities Changes

In the 2009 legislative session, the Legislature passed four major changes to the New School Facilities Program.

First, the Legislature extended the moratorium that was enacted during the FY 2008 legislative session on all new school construction activity. Because of the moratorium, the projects listed in Table 3 are on hold

Table 1
Schools under construction at the end of FY 2009

District	Project Type	Grade Level	SFB Approval Date	Student Capacity	Square Footage	Total SFB Funding	District Funding
Casa Grande Union	New School	9-12	2/2/06	1,995	187,500	\$31,579,446	\$29,395,917
Dysart Unified	New School	9-12	1/5/06	2,394	225,000	\$33,763,863	\$12,579,326
Florence Unified	New School	9-12	2/2/06	1,795	201,000	\$33,286,102	\$11,325,350
J O Combs Unified	New School	9-12	12/7/06	2,034	227,800	\$38,851,718	\$10,442,466
Litchfield Elementary	New School	6-8	11/2/06	1,088	87,003	\$12,032,228	\$4,196,414
Maricopa Unified	Additional Space	9-12	2/2/06	1,649	160,800	\$25,644,027	\$11,312,124

Overview continued

Table 2
SFB Cost Per Square Foot

Grade Configuration	Total Square Footage	Average Cost Per Square Foot
K-6	187,770	\$132.52
K-8	736,613	\$146.15
6-8	314,941	\$146.65
9-12	436,374	\$153.92

The costs presented in Table 2 represent the total project cost to construct school space to the SFB standard including meeting all local codes, the SFB minimum guideline requirements, as well as current ASHRAE 90.1 and IECC.

New School Facilities Changes-continued

until additional appropriations are provided by the Legislature.

Second, during the FY 2008 legislative session statute was changed to recognize kindergarten students as full students. In FY 2009, the Legislature changed this back to 1/2 ADM. While the majority of Arizona kindergarten students attend full-day programs, the new school construction formula requires the SFB to consider them as half-students. School districts that received New Construction awards in FY 2009 based on full-day kindergarten will be re-evaluated in FY 2010 based on the reversion of the law. If the districts no longer qualify, the projects will be cancelled.

Third, the Legislature clarified that the SFB may only change the legislatively approved new school construction formula for geographic and site conditions. The Board may no longer award increases for inflation.

Finally, the Legislature provided \$100 million in lease-to-own authority for the construction of new schools. Land acquisition and new construction funded from this authority are exempt from the moratorium. The authority must be issued through a new federal bonding program called Qualified School Construction Bonds. Under this program, the bond holder receives federal tax credits in lieu of interest.

Arizona Energy and Water Savings Grant Program

The School Facilities Board implemented the Arizona Energy and Water Savings Grant Program during FY 2008 and continued to manage and closeout the projects throughout FY 2009. Designed as a competitive grant program, the available \$2 million in funding was divided into two categories: development grants and implementation grants. See Exhibit II for a complete distribution list.

School districts submitted 27 applications for development grants and 164 applications for implementation grants. Table 5 and Table 6 list the awardees including the funding that has been expended and the current status of each project. In total, projects funded by the grants are expected to save \$500,000 per year with a total payback of four years. All projects will be completed in FY 2010.

Table 7 lists seven districts, as examples, that completed their projects by the start of FY 2009. The table compares energy use of the one year period from June 2007 through May 2008 with energy use from November 2008 through October 2009, except for Gilbert USD and Catalina Foothills USD. Gilbert USD compares energy use between October 2007 and September 2008 with October 2008 through September 2009. Catalina Foothills USD compares the data between FY 2008 and FY 2009. The savings are the actual savings over each twelve month period. The actual savings may also include other energy efficiency measures that the district may have implemented in addition to these energy and water saving grant projects.

Building Renewal Grant Program

In FY 2009, the Legislature created the Building Renewal Grant Fund and appropriated \$20 million for the School Facilities Board to administer and distribute to districts for the purpose of maintaining the adequacy of existing school facilities. As part of the FY 2009 budget fix, \$13 million was swept, resulting in a balance of \$7 million being allocated for Building Renewal Grant

projects. School districts may request Building Renewal Grant funding for primary building renewal projects which the Board will prioritize based on district routine preventative maintenance and the matching of monies provided by the fund. The SFB approved 27 Building Renewal Grant projects. These approvals are listed in Table 8. Please see Exhibit III for a complete distribution list.

5-Year Assessments

ARS §15-2002.A.3 requires the SFB to inspect school buildings once every five years to ensure the compliance with building adequacy standards as prescribed in ARS §15-2001. These inspections are designed to verify the reported size of each school and to ensure that each school continues to meet all State school facility minimum adequacy guidelines. In FY 2009, the School

Facilities Board inspected 127 schools in 20 districts. Commonly found deficiencies were the lack of the required science equipment, low lighting, missing jurisdictional inspection reports and drainage issues. At the end of each inspection, the school district governing board is notified about any identified deficiencies and the SFB works with the district to develop a plan to correct these deficiencies.

Overview continued

Preventative Maintenance Inspections

ARS §15-2002.A.3 requires the SFB to randomly select twenty school districts every thirty months and inspect them with regard to routine preventative maintenance. In FY 2009, the School Facilities Board inspected fourteen schools in six districts. These inspections have revealed some inadequacies in the preventative maintenance being performed by school districts mostly resulting from lack of funding and staffing levels. Prior to performing any inspections, the SFB developed a district self-evaluation

questionnaire, the inspection criteria and the form staff will use during the inspection process. The SFB also facilitates a training workshop as part of the inspection process to help individual districts with staff training and a 6-month follow-up to reinforce district staff knowledge.

Feedback from districts that have been inspected has been positive and reassuring that the SFB inspection efforts are effective and purposeful.

"The maintenance staff is more encouraged now to perform PM and I believe they have a better understanding of the importance of performing PM on a regular basis."

Overview continued

Statewide Structural Analysis

During FY 2009, the SFB saw a number of issues come forward concerning the structural integrity of several school buildings. Most jurisdictions do not require existing school buildings to be structurally analyzed after they are built and accepted for occupancy.

During the past year, two roof collapses have occurred and another truss failure discovered before collapse, as well as repairs needed to long span glue lamb beams in a school multipurpose room. Because of these issues, the SFB is working with the Arizona Risk Retention Trust to prevent further catastrophic failures.

Currently, the Trust is developing training videos to help school districts do self-assessments to identify potential hazards. The SFB has also incorporated these self-assessments into the 5-Year and Preventative Maintenance Inspections that go on continually. When an issue is discovered, the district is advised to procure the appropriate design professional.

To further these district self-assessments, the SFB will also use the Trust's videos for presentations with district organizations and school associations.

Overview continued

Statewide Water Intrusion Analysis

During the past year, the SFB has received several requests for funding for the repair of interior mold damage. What has been found in many cases is water intrusion through the exterior block walls into the interior of the building.

Water intrusion—building exterior
Camp Verde Middle School
Camp Verde Unified School District

Water intrusion—building interior
Camp Verde Middle School
Camp Verde Unified School District

In most cases, the recommended maintenance or recoating of the block sealant has not been done or has been done incorrectly. The SFB has incorporated testing of the exterior block of each school for water absorption in all 5-Year and Preventative Maintenance Inspections. When the test indicates there may be an issue with the existing block sealant, the district is notified so appropriate action may be taken.

Rilem tube used to measure absorption of a vertical surface

Building Renewal

The School Facilities Board distributes Building Renewal funds to school districts to help them maintain their existing facilities. Distributions are based on a formula that considers the size and age of existing space. At the end of each year, school districts submit expenditure reports to the SFB. However, in FY 2009 due to budget constraints, the Legislature did not fund the building renewal formula. Rather, \$20 million dollars in Building Renewal Grant funds was appropriated to help school districts maintain their existing facilities. The SFB continues to gather district expenditure data. A complete review of this data will be available on the SFB website in the coming months. See Exhibit II for a complete distribution list.

On the Horizon Initiatives

Arizona School Design Primer

The Arizona Chapter of the American Institute of Architects created a coalition of professional practitioners and civic leaders to coordinate efforts advocating for smarter school building projects. A dialogue between the AIA Coalition and the SFB began with the publication of the SFB report to the Governor in September 2007 titled,

“Building Arizona’s 21st Century Schools: Ensuring Innovative School Facilities for the Digital Age.” One of the outcomes of that dialogue has been the preparation of the “Arizona School Design Primer.”

The Primer is meant to be a quick read, hitting on overarching observations of the qualities that can motivate quality school design. The principal author of the Primer is AIA Member, and President of her own firm, Marlene Imirzian, AIA. Ms. Imirzian envisions the audience of the Primer as school board members, other local school district officials, and parents. Her hope is that the basic ideas presented in the booklet will raise the bar of expectations that Arizona can build smarter schools within the budget constraints we will be facing for the foreseeable future.

The Primer is on schedule for publication in late 2009. The SFB has been assisting with its production. Here are a few excerpts.

Focus of the Primer:

- To improve the quality of Arizona education with school designs that improve learning outcomes.

Overview continued

- To raise the level of discourse and expectations of school design within the State at the level of the key decision-makers (school district superintendents, school board members and key facilities personnel).
- To empower the key decision-makers for school design and construction in the State of Arizona with fundamental information needed to make good decisions regarding school design based on the most current research and successful project case studies.

The book focuses on the first building decisions that, once made, are often irreversible, in the hope that those first decisions can be made with better knowledge, leading to better buildings for learning.

ARRA Energy Grant Program

The Governor's Office through the Department of Commerce Energy Office directed approximately \$20 million of the State Energy Block Grant awarded as part of the American Recovery and Reinvestment Act (ARRA) funding for solar and energy efficiency projects for schools. The School Facilities Board has allocated approximately 30% of these funds for solar projects and 70% for energy efficiency projects.

The 30% allocated for solar projects equates to approximately \$5 million. The solar project grants will be awarded to districts based

on square footage, with priority given to the smallest school districts. The award includes solar water heating or a solar photovoltaic system from 4 KWdc to 30 KWdc.

The remaining 70% of the grant funding has been allocated for energy efficiency projects. These funds will mainly be used to replace and upgrade lighting, lighting controls, HVAC, and HVAC controls. The energy efficiency grants will be awarded through a competitive application process and will cover 30% of the total project cost, up to \$1 million per district. The school district will be responsible for funding the balance of the project cost and may use performance contracting or any available local funds. The criteria for project selection are life-cycle payback, energy savings measured by unit reductions, energy savings measured by dollar reductions, and impact on the school utility budget. Awards will be made at the January 2010 Board meeting.

Total	\$205,814,513	\$1,111,593	\$495,576	\$704,079	\$128,072,337	\$17,580,239

(1) Land disbursements include incidental land acquisition costs and lease payments to the State Land Department, which would not be reported as expenditures by the district.

(2) As reported by the districts for fund 695.

(3) As reported by the districts for fund 695. For districts that received FDK disbursements, the SFB assumed that the entire FDK disbursement was expended in FY 2009.

(4) Ending balance in fund 695 as of 6/30/09 as reported by the districts. This number will be compared to the ending balance as reported by the district in the Superintendent's Annual Report for FY 2009. If the balances do not match, the district will be required to reconcile the difference.

(1) If this calculated number did not match the ending balance for FY 2008 as reported by the district in the Superintendent's Annual Report for FY 2008, the district was required to reconcile the difference. In most cases, districts revised FY 2008 expenditures as reported to the SFB. In some cases, districts provided corrections to the Superintendent's Report. Some districts have not yet reconciled as of the date of this report.

(2) As reported by the districts.

(3) This calculated number will be compared to the ending balance as reported by the district in the Superintendent's Annual Report for FY 2009. If the balances do not match, the district will be required to reconcile the difference.

Exhibit VI
FY 2009 Deficiencies Corrections Fund (1)

District	Payments to Districts	Payments to Vendors	Total
Young Elementary School District	\$43,543	\$0	\$43,543
Beaver Creek Elementary School District	\$42,467	\$0	\$42,467
Total	\$86,010	\$0	\$86,010

(1) The Deficiencies Corrections program ended in June 2004. These are residual payments for projects approved while the program was still in effect.
