The SFB has calculated ADM yield factors for each school district in Maricopa County for FY2001 through FY2009. Due to lack of up-to-date housing data, similar time series is not available yet for other counties.

The ADM yield factor is calculated by dividing a district's 100th day ADM by the number of existing housing units in that district as of the middle of the fiscal year. For example, ADM yield factor for FY2001 = (District's FY2001, 100th day ADM) / (Number of existing housing units as of December 31, 2000). Presented in this table are ADM yield factors for FY2001, FY2005, and FY2009. Some districts had very stable ADM yield factors over the decade; others experienced significant changes in their ADM yield factors. Data sources: ADM from Arizona Department of Education; Year 2000 baseline population and housing information from U.S. Census Bureau and National Center for Education Statistics; Subsequent residential completion data from Maricopa Association of Governments. Neither the SFB nor the source agencies can guarantee the accuracy of the information presented here.
