Description of Problem

Please include a detailed description of the issues, as well as a description of and a copy of any professional studies, citations or reports from government entities, recommended solutions, and any cost information or estimates. If additional space is needed, please attach.

The windings on the air conditioning compressor in classroom 305 at Vista Del sur shorted out. As a result of the compressor shorting out it contaminated the entire system including the oil chamber and the evaporator and condenser systems. There was no way to affectively clean the unit so it had to be replaced. The unit is approximately 6 years old. Because this was an emergency given the outside temperature and the fact that it is used in a classroom environment, we purchased a 4-ton Horizontal Water-Source Heat Pump from Climatec Building Technologies. A Purchase Order was issued to Climatec; #130865 in the amount of \$2,915.04 and this price does include tax. I tried to attach a copy of the Purchase Order but there was an error with the SFB system; Pat Cruse has a copy of the PO.

Project Category: HVAC
