School Site: Westview High School

Buildings:

Description of Problem

Please include a detailed description of the issues, as well as a description of and a copy of any professional studies, citations or reports from government entities, recommended solutions, and any cost information or estimates. If additional space is needed, please attach.

Westview high school was built in 1889-1990 and located 107th Avenue and Garden Lakes Parkway. We currently have four boilers that are over 23 year old and have past their life expectancy. The hard water has compromised one of the tanks and the other has started to show signs of failing with respect to the tank in building 900. This has become a safety and health issue with only one boiler that operates at times. There is another boiler in building 300 that also works at times. Although, the district has been proactive in replacing nine of the thirteen water heaters and boilers at Westview high school now we need your assistance in replacing these three units.

- Building 900 –two 800,000 BTU/400 gallon boilers installed 1889

- oOne is offline and not operational

- oSecond is constantly failing and tank is showing signs of failing

- Building 300-one 300,000 BTU/125 gallon boiler installed 1988

- oThis is constantly inoperable

The estimated cost to replace these units is \$150,000 and to have an engineer evaluate, design and commission the units is estimated at \$8,000.00. This project is critical to the operation of the school and you immediate attention is requested on the health and safety matter.

Project Category: HVAC

Are any of the above-described issues in buildings or part of buildings that are leased to another entity, including a district sponsored charter school? ?

Available Funding

Current unencumbered building renewal fund balance (Fund 690):	\$0.00
Amount of Local funds planned for this project	\$8,000.00

Building Renewal Grant Application

Please outline any associated insurance coverage.

This is not covered under insurance
