School Site: San Manuel High School

Buildings:

Description of Problem

Please include a detailed description of the issues, as well as a description of and a copy of any professional studies, citations or reports from government entities, recommended solutions, and any cost information or estimates. If additional space is needed, please attach.

The 2 Sun Manufacturing single inlet\media eevp coolers on the gym were built in 1991 and installed in 1993. The high humidity on these units has rusted out the floors in both units, they have had freeze breaks repaired, and are beyon repair. We have had 3 vendors come and look at these units, but they have all got different ideas as to what needs to be installed in their place. The only way to get a true apples to apples price comparison is to get an engineering study to tell us what is actually needed, and then send that out for comparative quotes.

Project Category: HVAC

Are any of the above-described issues in buildings or part of buildings that are leased to another entity, including a district sponsored charter school? N

Available Funding

Current unencumbered building renewal fund balance (Fund 690):	\$50.00
Amount of Local funds planned for this project	\$0.00

Please outline any associated insurance coverage.

They are beyond their service life. Wear isn't an insurance issue.
