Application Title: Hot Water Boiler project at Mile High

Description of Problem

Please include a detailed description of the issues, as well as a description of and a copy of any professional studies, citations or reports from government entities, recommended solutions, and any cost information or estimates. If additional space is needed, please attach.

Currently we have three hot water heaters at Mile High Middle School which are leaking. These are located in the Auditorium/Administrative Wing (1002) and they serve the gym/cafeteria wing (1007). These units are prime candidates for failure at any time. One of these has already received a "Band-aid". If one of these were to burst, it could cause damage to the building or serious personal injury to a person. The conditions of the lines between these locations have experienced high levels of degradation (Insulation). This is due to sub-terranean water/moisture. These lines have had to be repaired several times. The entire system has been looked at by the Arizona Risk Retention Trust and the State Boiler Inspector. Because this system is so deteriorated and not up to code, they have indicated to us they would like to see the system replaced. I think if we delay this, we could be looking at a potential for formal condemnation.

Project Category: HVAC

Are any of the above-described issues in buildings or part of buildings that are leased to another entity, including a district sponsored charter school? N

Available Funding

Current unencumbered building renewal fund balance (Fund 690):	\$61.40
Amount of Local funds planned for this project	\$0.00

Please outline any associated insurance coverage.

Building Renewal Grant Application

Since this condition has developed over time, the insurance company will not replace this.
