Project Title: Walk Path Between Campuses

Project Detail: Our project proposal is to maintain an existing pathway between our two schools by purchasing a tractor and attachable rotary cutter, and using in-house District personnel to do so. The pathway is located between the two school campuses in our small and rural district. We are also requesting to use adjacent ways funds for the labor that our staff works on this project. Our community does not have a city municipality to maintain roads, sidewalks, or pathways. This specific pathway was put in by the County in 2012 with extra millings that our county had left over from a different project and offered to install. The drainage maintenance around this pathway and vegetation growth needs to be cut regularly or it creates flooding and visibility issues for drivers and pedestrians. In 2013 we had two students who crashed in to a school bus at an intersection located on the pathway and were seriously injured. At least one of these parents has expressed to us that they consider the overgrown vegetation located around the pathway, which limited all parties' visibility, the main contributing factor in the accident. This pathway is not located on school district property. The pathway is located next to the 2nd street and connects the two schools in our small district. The only restaurant in our town (Mr. G's Pizza) is also located along this street making it even busier during the school year.

Project Date Range: 8/1/2018 TO 12/1/2020
Total Project Cost: \$31,000.00 Adjacent Ways Cost: \$31,000.00
