SCOPE OF WORK

ASPHALT REPAIR: ADJACENT WAYS

REMOVE & REPLACE AREAS: Sawcut, excavate, and remove deteriorated asphalt totaling 1065 square feet in 3 areas. Pave with hot asphalt and compact to a depth of 3 inches with steel drum vibratory rollers. NOTE: Our initial assessment indicates an excavation depth of 3 inches. POLYMER MODIFIED SLURRY SEAL (TYPE II): ADJACENT WAYS FUNDING

Thoroughly clean approximately 1973 square yards of existing pavement surface.

Apply a **MAG Type II CATIONIC polymer modified slurry seal** at the rate of 15-18 pounds per square yard.

Polymer modifications to Slurry Seal improve binder cohesion and abrasion resistance, lessening the impact of raveling and scuffing especially in tight parking lot or cul-de-sac areas.

NOTE:

This operation will be done in 1 mobilizations. Additional trips, if requested, are billable at the rate of **\$1200** each. Work performed on weekends may incur additional charges.

Work areas must be clear of obstructions, If it is necessary to move vehicles from work areas, Ace asphalt will tow vehicles and relocate to a designated area to be recovered by owners. Towing charges will be billed at a rate of \$55.00 per vehicle.

Slurry seal does not compare cosmetically to an overlay. It does not favorably alter any existing poor drainage and will not adhere to oil spillage areas that have saturated the pavement surface unless prior repairs are made. Scuffing, raveling, inconsistency in appearance, and visible seams on the new slurry surface are normal and to be expected with the best application methods and materials for this service. Power steering marks are unavoidable and should not cause undue concern.

Reflective cracking will occur as movements of the underlying asphalt occur and break through to the surface.
