<i>Description</i>	<i>Unit Price</i>	<i>Quantity</i>	<i>Total</i>
<u>CLEANING OF ASPHALT</u> Preparation of asphalt consisting of, Weed eating in overgrown cracks, deep cleaning with wire brush to break up debris (allowing for a proper bond). Use Billy Goat blowers to get rid of excess dirt and rocks. Application of tack oil where areas that have excessive dirt and put Oil Spot Primer on all oil spots in parking lot. Estimate in square feet. Tack Coat will significantly improve the bond between pavement layers, improving pavement strength, reducing surface-course sliding and reducing top-down cracking	\$0.05	64186.00	\$3,209.30
<u>CRACK-SEAL</u> Blow cracks free of dirt and debris. Apply Elastoflex 600 Series crack sealant to opened cracks. Elastoflex is a hot applied, polymer modified asphalt crack sealant. This product applies and sets up best in hot temperatures, and is highly durable in cold climates too. This product is ideal for highways, county roads, municipal streets, parking lots and pathways. Elastoflex is a great value for stretching pavement maintenance dollars. Estimate does not include 75% coverage in alligatored areas unless requested. Estimate in linear feet	\$0.55	19962.00	\$10,979.10
<u>PITCH BLACK SLURRY</u> Machine clean entire asphalt surface. Treat spots with Tack Oil or Oil Spot Primer as required. Apply Pitch Black Slurry pavement sealer by squeegee. Pitch Black Slurry is a blend of Pitch Black Sealcoat with additional emulsion, aggregate, and polymer for optimal performance on eroded asphalt. Estimate in square feet.	\$0.33	34186.00	\$11,281.38
<u>STRIPING</u> Professionally stripe existing layout	\$1,345.00	1.00	\$1,345.00

Total \$26,814.78

THANK YOU FOR YOUR BUSINESS!

Warranty: Sealcoating asphalt pavement protects it from sun, oxidation, weather, water and improves friction for drivers. Items not considered to be warranty repairs include but are not limited to, damage from snow blowers, snowplows, shovels, chemicals, tree sap, traffic, patches, power steering turns, new and reopened cracks or abuse. Sealcoating around edges where asphalt meets concrete like drains, islands, curbing and sidewalks does not fix existing problems from sinking asphalt. This will prevent further damage from happening to the base that is already defected, if perimeter is maintained regularly. Alligator cracks that are requested to be crack-sealed are a temporary fix because the base underneath is likely failing. Crack-sealing these areas will not stop asphalt problems and cracks will eventually shine back through area.

A FINANCE CHARGE will be assessed if accounts are not paid when due. In the event that payment is not made in full to OnSite Asphalt, OnSite Asphalt shall be entitled to all of its costs, including attorney and lien fees, in connection with the enforcement of this contract. This estimate price is good for 30 days, we will have to re-evaluate pricing after that.

Property Damage Release: It is the owner(s), manager(s) or the signer of this proposals responsibility to ensure all fragile, breakable or potential damageable items that can be moved from asphalt surface are removed from the safety-working zone area (ex. Vehicles/Trailers, Portable Basketball Hoops or items that pertain to your business/home). The safety-working zone should be considered any area within 20' of the nearest asphalt surface. Any potential hazard(s) shall be communicated to the foreman on duty prior to starting the project. Signing this proposal releases OnSite Asphalt from any damage within the safety working zone and all legal costs associated with the proposed project. Thank you for your understanding in regards to this matter. If you have any questions or concerns, please contact your salesman.
