

A1.2 Site Utilities: Storm Water Systems Scope of work as outlined on C4 and C5

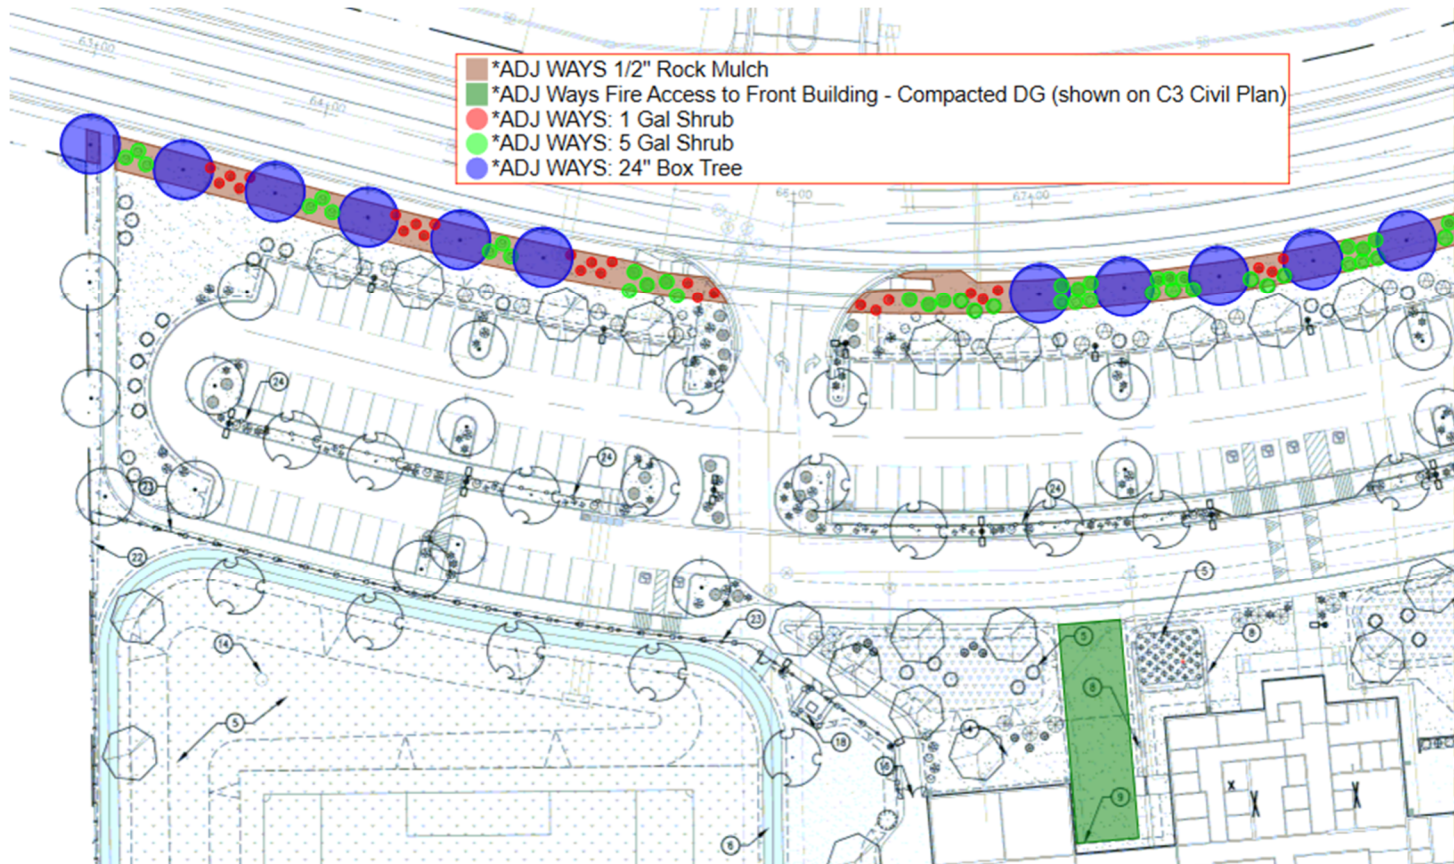

- The Town of Marana (AHJ) requires this project to receive storm flow from the public road and ROW. This is an atypical requirement and necessary because of the particular characteristics of the surrounding development. As it has historically been farmland, there is low slope across the public development, the existing soil is less pervious and there is no public storm system in this area. Normally this would be designed as offsite drainage but the limitations of the public right of way do not support that approach.

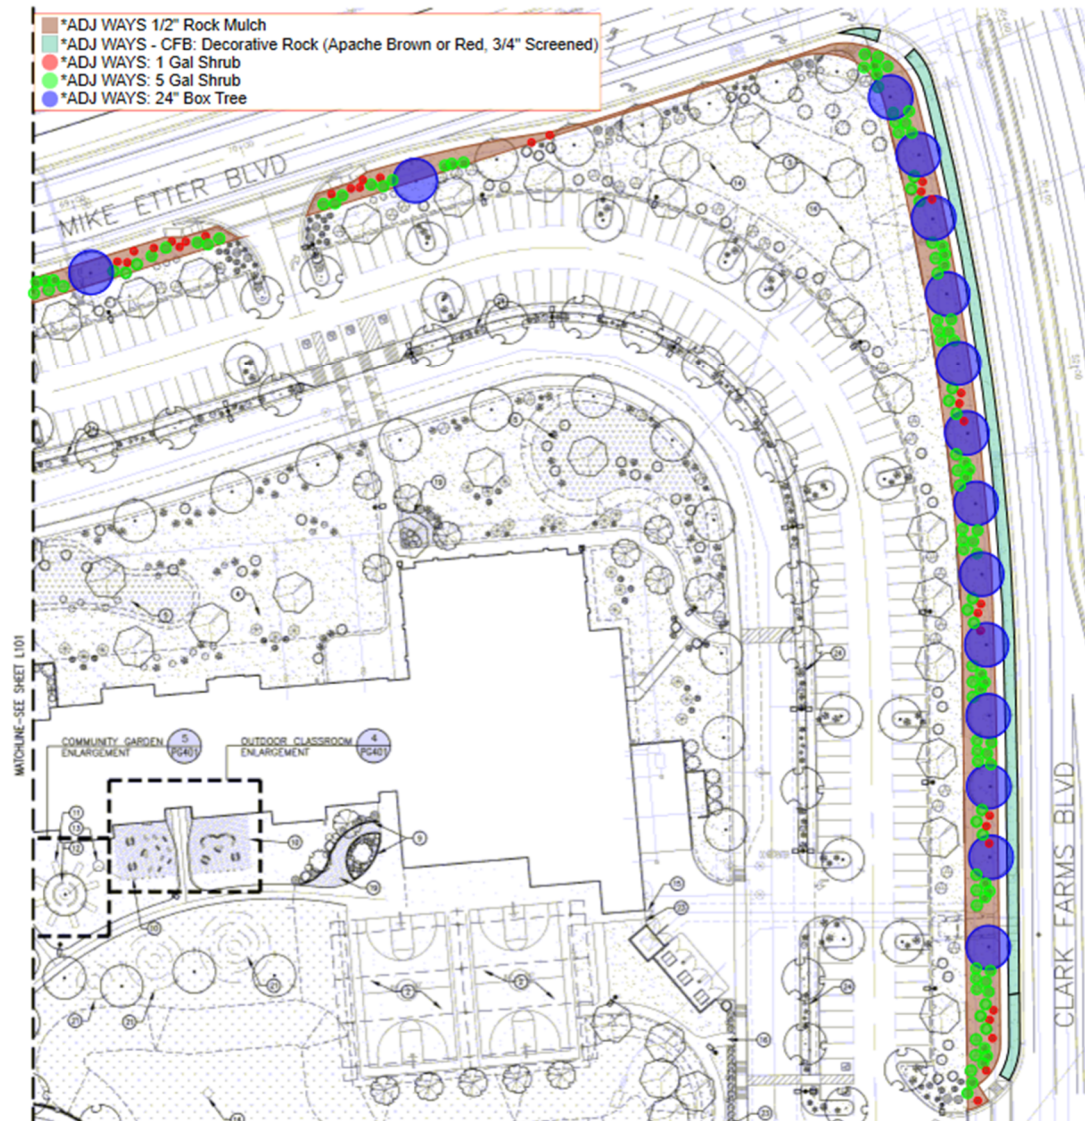

A1.3 Site Signage & Striping Scope of work as outlined on C3, C4, C5, and C6

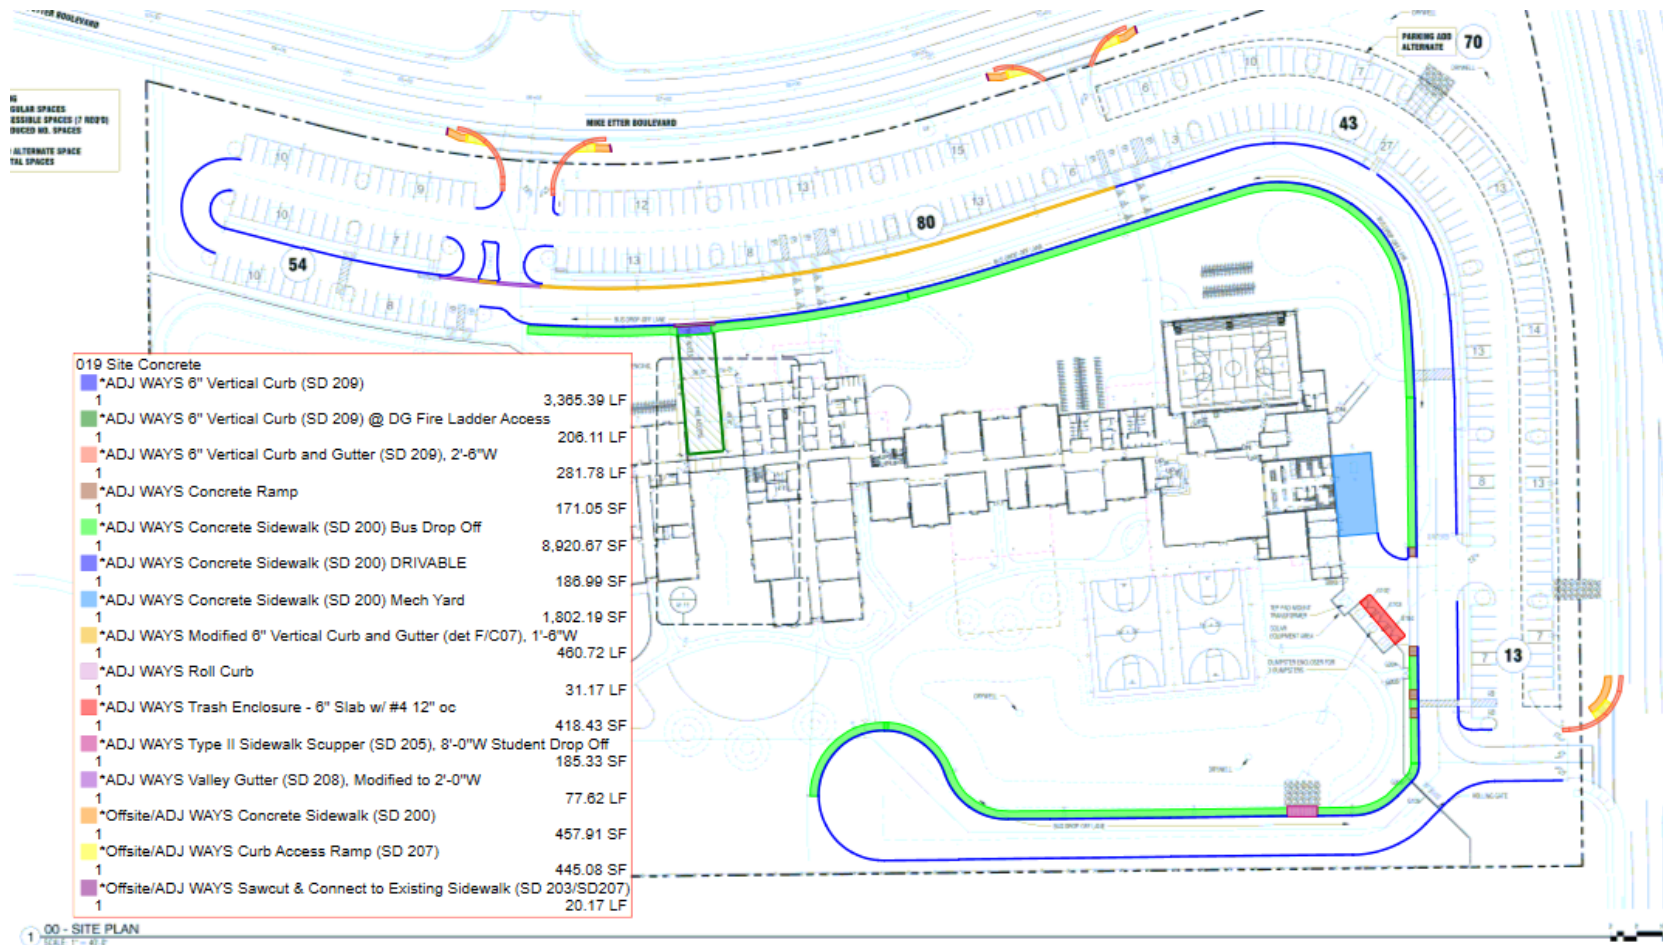

A1.4 Landscape and Irrigation Scope of work as outlined on L101 and L102

A1.5 Site Concrete Scope of work as outlined on C3, C4, C5 and C6
