Project Title: Joyce Clark Traffic Flow Change Project

Project Detail: At this time the traffic flow runs South to North with two lanes directly in front of the front office. This puts the passenger door away from the school building and forces the students to have to walk in front of other cars. I witnessed a student almost get struck by a car by exiting their vehicle and walking in front of another car in which the driver was not paying attention.

We are also requesting to have the bus flow changed from traveling around the school grounds to the front of the school near the office. This will allow us to keep the gates closed during morning and evening drop off and release times, keeping the school in a more secure environment.

We are asking for funding to switch the direction of traffic to North to South which will allow the buses to pull up to the front of the school. This will also have the effect of changing the direction of the parent drop off traffic to place the passenger door towards the building preventing the student from having to walk through vehicle traffic.

This proposed work area is also in need of maintenance, so in addition to the traffic striping for directional traffic flow, a seal coat will also be applied.

Project Date Range: 5/9/2025 **TO** 6/9/2025

Total Project Cost: \$9,995.00 **Adjacent Ways Cost:** \$9,995.00
