Request For Information
Project: PDS School entry way
RFI: #1
Date: 3/11/2026

To: Sierra Vista School District
From: Ultra 2 Construction
Subject: Entry way replacement due to tree root damage

Description of issue:

During site work operation, it was observed that an existing tree root has uplifted and damaged a section of the asphalt pavement in the project area. The root growth has caused cracking and displacement of the asphalt surface making the pavement uneven and unsuitable for its intended use.

Request:

Approval to recompact the subgrade /base material and replace the removed section with new asphalt to match existing thickness and finish.

Proposed Solution:

Our proposed approach is to saw cut around the damaged are, remove the existing asphalt, address the root obstruction as directed , reprepare the base, and install new asphalt to restore the surface to original condition.

Cost:\$2,400.00
