The SFB has calculated ADM yield factor for each school district in the state as of FY2000. For school districts in Maricopa County, yield factors were also calculated for subsequent years. Due to lack of up-to-date housing data, similar time series is not available yet for other counties.

The ADM yield factor for FY2000 is calculated by dividing a district's 100th day ADM by the number of existing (occupied) housing units in that district as of the Census Day (April 1, 2000). This is slightly different than the way yield factors are calculated for districts in Maricopa County for subsequent years (see the Maricopa County document for detail). Data sources: ADM from Arizona Department of Education; Population and housing information from U.S. Census Bureau and National Center for Education Statistics. Neither the SFB nor the source agencies can guarantee the accuracy of the information presented here. It should be noted that a district's ADM yield factor can change considerably over time depending on the changing demographics of the district.
