**RE:** Resources for School Facilities Best Practices

SFB staff wants to be your 'go to' source for school facilities best practices. Below is a link to resources from Build America's School Infrastructure Coalition (BASIC), a group whose mission is to make school facilities "safer, healthier, and educationally appropriate."

According to BASIC's website, the coalition includes "non-partisan organizations and individuals who support federal funding to help underserved public school districts modernize their facilities."

As SFB staff uncovers useful school facilities resources for Arizona school districts we will get them into your hands right away.

Click [HERE](#) to view the list of downloadable resource material.

Please contact us with any questions.

**About the Arizona School Facilities Board**

Created in 1994, the Arizona School Facilities Board (AZSFB) is a cabinet-level, state agency managing \$650 Million in state funding for K-12 school district facilities. The 10-member board meets monthly to grant financing for new school construction and funding to renew existing school facilities. AZSFB staff is a partner/advocate for school districts in facilitating successful Building Renewal Grant requests.
